School.

Postgraduate Certificate in Medical Education September 2011 Registration

- Are you interested in Medical Education?
- Are you engaged in the delivery or management of Medical Education as part of your role?
- Would you like to enhance your personal and professional effectiveness in the field of medical education?

Then this course is for YOU!

Although the course is primarily designed for doctors, we do welcome interest from individuals without a medical qualification who have a Professional interest or role in health professions education.

The aims of the course are to enable participants to:

- design and deliver effective professional education based on accepted principles
- reflect critically on their individual professional practice;
- speak and write about the theory and practice of education in an informed manner;
- critically select and apply appropriate methodologies in the conduct of educational research.
